

Handika Pratama Nainggolan

Aspiring DevOps Engineer · IoT Systems Builder · Cloud & Linux Enthusiast

handikanainggolan24@gmail.com | +62 822-7631-0317 | github.com/handika-nainggolan | linkedin.com/in/handika-pratama-52178332b | Situluama, North Sumatera, Indonesia

SUMMARY

IT Del student majoring in Computer Engineering with a strong interest in DevOps, Cloud Computing, Linux, Kubernetes, and IoT. Actively exploring CI/CD pipelines, Docker, and Kubernetes to build scalable infrastructure. On the IoT side, designs embedded systems using Arduino, sensors, and MQTT protocols. Embraces a continuous learning mindset, always exploring new tools and contributing to the DevOps ecosystem.

EDUCATION

Diploma in Computer Engineering | *Institut Teknologi Del (IT Del) – Toba, Indonesia* 2023 – Present
Currently pursuing Diploma in Computer Engineering with focus on DevOps, IoT, and systems programming.

EXPERIENCE

DevOps Engineer Intern | *PT Telkom Indonesia* February 2026 – July 2026

- Assisted infrastructure team in implementing DevOps practices across Telkom's internal platforms.
- Containerized applications with Docker and managed Kubernetes deployments for production workloads.
- Built CI/CD pipelines and performed real-time monitoring with Prometheus & Grafana.

Member – Del Cyber Security Club | *Institut Teknologi Del* 2023 – Present

- Participated in cybersecurity workshops, ethical hacking activities, and network security learning sessions.
- Contributed to security awareness programs within the campus community.

National Finalist – Huawei ICT Competition (Computing Track) | *Huawei ICT Competition* 2025

- Competed in the National Final of the Computing Track, covering cloud computing, networking, and operating systems.

CTF Competition Participant | *Del Cyber Security Club – IT Del* 2024

- Participated in Capture The Flag competitions across web exploitation, reverse engineering, cryptography, and forensics.

PROJECTS

Smart Aquarium Monitoring System | *Academic Project* 2025

- Designed IoT-based aquarium monitoring with real-time water quality tracking, automatic feeding, and web dashboard.
- Deployed on Kubernetes using Deployments, Services, Ingress, ConfigMaps, Secrets, PV, and HPA for high availability.
- GitHub: github.com/handika-nainggolan/smart-aquarium-monitoring-system

Distributed E-Commerce System | *Academic Project* 2025

- Built event-driven microservices platform using Apache Kafka, MongoDB, Express.js, and Docker.
- Implemented JWT authentication, Redis caching, User/Product/Order services for scalable order processing.
- GitHub: github.com/handika-nainggolan/sistem-terdistribusi

- Linux Monitoring Platform** | [Personal Project](#) 2026
- Built self-healing monitoring solution using Bash Script, Crontab, Prometheus, Grafana, and Docker.
 - Automated service monitoring, activity logging, and real-time dashboards for CPU, memory, disk, and network metrics.
 - GitHub: github.com/handika-nainggolan/monitoring-platform-sistem

- DevOps Node.js Kubernetes Pipeline** | [Personal Project](#) 2026
- Full end-to-end DevOps pipeline: multi-stage Docker builds, Kubernetes Deployments with ConfigMaps & Secrets.
 - Automated CI/CD with GitHub Actions triggering build, test, and deploy on every git push with health check probes.
 - GitHub: github.com/handika-nainggolan/devops-nodejs-kubernetes-pipeline

- Personal Portfolio Website** | [Personal Project](#) 2026
- Fully responsive React.js portfolio with dark/light theme, typewriter animation, and PDF certificate viewer.
 - Deployed on Vercel.
 - GitHub: github.com/handika-nainggolan

AWARDS & ACHIEVEMENTS

National Final Participant – Huawei ICT Competition 2024–2025 (Computing Track) | [Huawei](#)
December 2024

Red Team Cyberwolves Academy | [Hactrace Indonesia](#) May 2026

Getting Started with AWS | [Certification](#) October 2025

Introduction to IoT and Digital Transformation | [Simplilearn](#) 2025

Network Fundamental | [Aguna Course](#) 2025

Introduction to Cloud Computing | [Simplilearn](#) 2025

SKILLS & TECHNOLOGIES

DevOps & Infrastructure: Linux, Docker, Kubernetes, Git & GitHub, CI/CD, Terraform, Ansible, Prometheus, Grafana, Networking

IoT & Embedded Systems: Arduino, Raspberry Pi, MQTT, Sensors, Embedded Systems

Programming: Python, JavaScript, Bash Script

Databases & Tools: MongoDB, Kafka, Node.js, VS Code, Postman

Soft Skills: Problem Solving, Continuous Learning, Teamwork
